# **SITUATION SUMMARY**

## **Los Coyotes Indian Reservation, San Diego County**

As a result of rains and flash flooding on the Los Coyotes Indian Reservation in San Diego County, Mission #2016-Southern-22320 was approved to address the community life safety needs, road repair, and other critical concerns in conjunction with FEMA, Bureau of Indian Affairs (BIA), Cal OES Southern Region, Cal OES Tribal Advisor, Caltrans Region XI, San Diego County OES, and Los Coyotes Tribal personnel.

- Caltrans installed five (8'x12') steel plates along with safety signage to provide temporary road stability and improved access over the Los Coyotes Reservation's only life line road.
- Stakeholders will continue to monitor the situation to provide long term solutions.
- Per the Cal OES Southern Duty Officer (SDO), conference calls addressing the long-term road repair solutions are on hold pending the findings of the BIA's Transportation Manager/Engineers site visit.
- The Cal OES Southern Region Tribal Point of Contact, Territory Representative, and SDO continue to monitor the incident.

## **Weather of Concern**

### **Northern California**

- A weather system will bring a better chance of showers to much of Northern California tonight through Friday night.
- Chances for showers and isolated thunderstorms will increase this evening and tonight as the cold front moves across Northern California.

### **Southern California**

- A low will cross California and bring possible precipitation from Lompoc northward on Friday and along the north slopes Friday night.
- A high will build in over the weekend for breezy winds and a slight warmup.
- Another low should arrive by Monday for normal temperatures, partly cloudy skies and breezy winds.

# **WEATHER**

## **WEATHER SYNOPSIS BY REGION:**

### **NORTHERN CALIFORNIA**

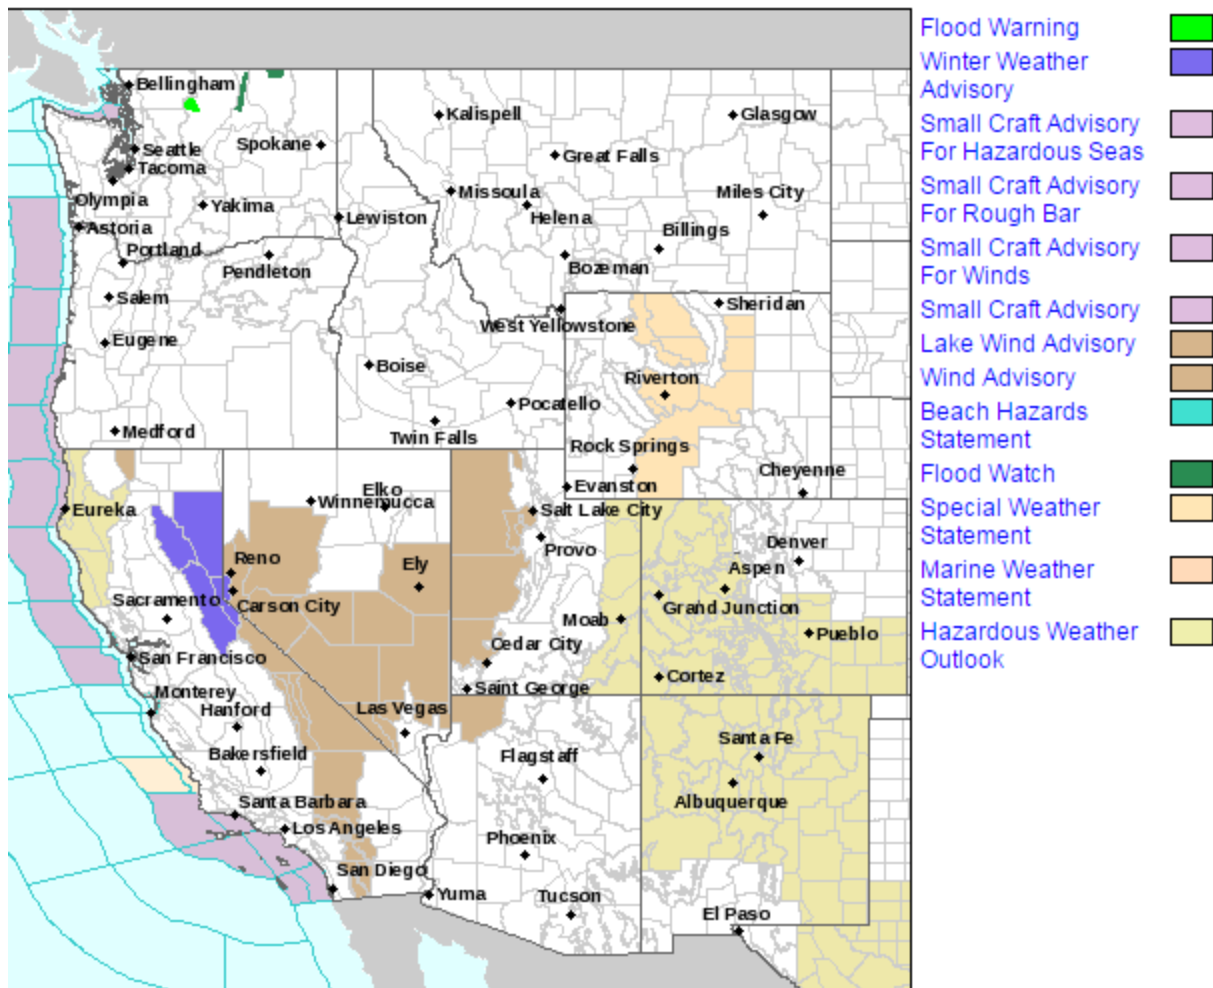

A fairly strong low pressure trough is approaching the coast. Clouds have already increased over Northern California. Southerly winds will increase throughout the day, reaching 20-30 mph in open areas this afternoon and evening. Showers will develop in far NW CA this afternoon and spread east and south overnight. Friday will be mostly cloudy to overcast across Northern California as the main low passes overhead. Wetting rain is expected in just about all of Northern California by Friday evening, with the greatest amounts being 1.50-2.50 inches at higher elevations. Snow levels will drop to about 5000-6000 feet with the trough. Partly cloudy and mild weather is expected in most areas Saturday into early Sunday. However, a few showers are still possible in the northern mountains. Another trough late Sunday and Monday will produce more showers, mainly in northern and eastern areas. A third trough may bring light rain to much of Northern California Wednesday and Thursday.

### **SOUTHERN CALIFORNIA**

The first of two weak frontal systems will move through Northern California tonight and Friday, which will lead to cooler and more humid weather. There will be some light shower activity developing late tonight into Friday across the northern portion of the area. Rainfall of 0.10" – 0.25" will be possible from San Luis Obispo and Fresno County northward before showers taper off over most areas Friday night. The rest of the area will see breezy and cooler weather. Temperatures Friday will be near, or perhaps a degree or two below, seasonal averages. Southwest winds of 15-25 mph with gusts to 45 mph will extend from the Kern County Mountains and the Banning Pass eastward across the entire desert Friday afternoon. Some light showers will be possible Friday night across the Grapevine and the north sides of the Angeles and San Bernardino National Forests as the system pulls east of the area. This weekend, expect a modest warming trend with weaker winds. Another system arriving Sunday night and Monday may bring about half as much rain to Central California as the first system. Gusty north and northwest winds will be likely next Monday through the middle of the week. Some wind gusts to 40 mph will be possible then along the central coast, the I-5 Corridor and the San Joaquin Valley. Another system may arrive next Thursday, bringing light rain to Central California and breezy conditions elsewhere by the end of the week. No excessively hot or dry conditions are expected during the next 7-10 days.

# STATE WEATHER MAP

GOVERNOR'S OFFICE  
OF EMERGENCY SERVICES

# **CAL OES 2014 DROUGHT**

## **Cal EOC Incident – 2014 Drought**

- The SOC is activated in support of the Drought State of Emergency and continue to monitor the situation.
- The Governor issued Executive Order B-26-14 on 09/19/14, to streamline relief efforts for families with drinking water shortages due to drought, specifically through the California Disaster Assistance Act, to provide temporary water supplies to households without water for drinking and/or sanitation purposes.
- The Governor issued Executive Order B-29-15 on 04/01/15 which announced actions that will save water, increase enforcement to prevent wasteful water use, streamline the state's drought response and invest in new technologies to make California more drought resilient.
- CDAA 2014 Drought Fact Sheet and Frequently Asked Questions provided to Regions for reference and distribution.
- Cal OES Recovery continues to coordinate the Community Impacts Workgroup conference calls. Currently, the calls take place on alternating Wednesdays.
- Cal OES Recovery/Individual Assistance finalized an updated 2015 version of the drought brochure of programs and services for individuals, businesses, farmers, and ranchers. It has been put on the Governor's Drought webpage. State agencies may put the following link to the brochure on their webpage <http://ca.gov/drought/pdf/Drought-Assistance-Brochure-2015.pdf>
- Cal OES Regions (Inland, Coastal, Southern) collective OA drought call is facilitated by the SOC and will be held once per month.
